

WELLBORE MILLING SERVICES

War Horse Fishing and Rental Tools offers a full line of open and cased hole wellbore milling services. War Horse mills are constructed with carbide inserts and/or crushed carbide.

- **Junk Mills (Bladed, Piranha, Concave and Flat Bottom)** – used to remove stuck pipe, packers, plugs, cement, and other wellbore debris.
- **String/Watermelon Mills** – used for milling restrictions, collapsed pipe, removing doglegs and key seats, and to expand whipstock pipe windows.
- **Pilot Mills** – used to mill casing, liners, washpipe, or rotary shoes.
- **Rotary Shoes** – used to free pipe that has become stuck due to sand, mud, or collapsed formation as well as for milling over packers, cement retainers, and bridge plugs.
- **Taper Mills** – used for reaming collapsed casing, liner sections, or other restrictions.

In addition, War Horse has a full line of auxiliary tools to support our wellbore milling services. These tools include: hydraulic jars, boot baskets, casing scrapers, mechanical and hydraulic cutters, and fishing magnets.
