

POWER SWIVEL SERVICES

War Horse Fishing and Rental Tools offers 85 ton 2.5 and 120 ton 3.5 Power Swivel Services.

War Horse Power Swivel Services utilize:

- Variable displacement, closed loop hydraulic systems
- Reversible over center pumps
- Electric controls

The speed control is continuously variable over the entire operating range. A pressure compensating torque control overrides the speed control to maintain maximum torque. The torque limits of the power unit can be set thus eliminating the potential danger of twist-offs or over-torqued connections in the drill string.

An integral rotary swivel bearing, floating washpipe assembly, and gooseneck connection eliminates the need for a separate rotary swivel.

	<u>85 Ton 2.5</u>	<u>120 Ton 3.5</u>
■ Swivel Head Weight (lbs)	1,165	2,000
■ Maximum Torque (ft-lbs)	3,950	8,100
■ Maximum RPM	150	150
■ Nominal Load Rating (tons)	85	120
■ 100 RPM Load Rating (tons)	45	65
■ Maximum Circulating Pressure (psi)	5,000	5,000
